

Hydratech Industries

Water from Air — Anytime, Anywhere

Mission

Building technology to end water scarcity for good by developing atmospheric water generation (AWG) systems that deliver clean water to remote operations.

HydraBox — Key Specs

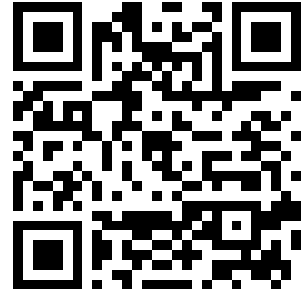

- Output: 2–5 L/day (environment dependent)
- Power: Solar + battery or standard AC
- Design: Portable, rugged, field-serviceable
- Water quality: Multi-stage filtration (sediment + carbon)

R&D Focus

- Thermoelectric condensation and optimized heat exchange
- Adaptive airflow and power management for liters-per-watt gains
- Durability: ruggedized enclosures and replaceable consumables
- Pilot deployments with NGOs and field partners

Vision

Scale atmospheric water generation across units and clusters to enable reliable, decentralized water access for mission-critical operations and communities.
